## CNG UPFIT & FUELING BY CREATIVE BUS SALES & CLEAN ENERGY

Compressed Natural Gas (CNG) is cleaner, cheaper and domestic when compared

to gasoline and diesel fuel. Natural Gas is the cleanest fuel available today with greenhouse gas emission reductions of up to 30%, while offering fleets significant savings at the pump - over \$1.00 per gallon versus retail gasoline.

Creative Bus Sales & Clean Energy are dedicated to providing alternative fuel options for the transportation industry. Each installed upfit kit is certified by C.A.R.B. to insure it's compliance for emissions, warranty and durability. The C.A.R.B. test ensures that the vehicle meets or exceeds the same stringent requirements that the original manufacturer (OEM) met when they submitted their gasoline or diesel powered vehicle for certification. Creative Bus Sales upfit teams participate in the rigorous training programs of NGV, Component Manufacturers and the NGVI to ensure upfits are of the highest level of quality and longevity.

Our 1 1/2 acre facility in Chino, CA is entirely devoted to installing CNG (Compressed Natural Gas) kits on EPA and CARB approved vehicles.
